

The August pipeline does not cover the target, and the July-to-August upside is re-categorisation, not new pipeline.

Open pipeline \$2.73M against a \$2.90M target (0.94x coverage). Weighted forecast \$1.33M, 46% of target. Four stale opportunities, one past its close date, and one Commit deal carrying 32% of the weighted forecast.

SNAPSHOT DATE
2026-08-20

PRIOR SNAPSHOT
2026-07-18

SOURCES

DATA
Synthetic — fictional companies

Forecast call: exposed — the target is not reachable from the current open pipeline

FORECAST CALL

Exposed. The weighted forecast is **\$1.33M**, 46% of the \$2.90M target. Even a 100% win rate on every open opportunity leaves the target \$170,000 short.

- Coverage is below 1x.** Open pipeline $\$2,730,000 \div \text{target } \$2,900,000 = 0.94x$. Prior snapshot: $\$2,705,000 \div \text{same target} = 0.93x$. *current-pipeline.csv, targets.csv*
- August's +\$384,250 weighted gain came from category upgrades on three existing deals** (Aster Health, Dovetail Travel, Junction Apparel) and a +\$25,000 amount change (Lantern Beauty). No opportunity was added, closed, or removed; open pipeline grew only \$25,000. *current-pipeline.csv vs prior-pipeline.csv*
- Concentration is high.** The two largest open opportunities hold 46.9% of the weighted forecast (prior 45.0%). Dovetail Travel is the only Commit deal and 32% of the weighted forecast on its own.
006SYNAUG004, 006SYNAUG001
- The data behind the upside is contradictory.** All three upgraded deals now show StageEnteredDates earlier than the prior snapshot, in which they were still in Proposal. Four opportunities (\$415,000) are stale and one has a close date already in the past. *see pages 4 and 5*

0.94x

Coverage — open pipeline $\div$ target
 $\$2,730,000 \div \$2,900,000$

\$1.33M

Weighted forecast — 46% of target
 Prior $\$945,750 + \$384,250$

47%

Weighted forecast in top two deals
 $\$420,000 + \$204,000$ of $\$1,330,000$

Implication for this meeting. Decide how the \$170,000 coverage gap is closed and which owner verifies the three upgraded deals before the forecast is committed upward. Actions on page 7.

Open pipeline is 0.94x of target and the weighted forecast 46% — the gap exists before any deal is lost

Open pipeline, weighted forecast and target

Weights per forecast-rules.md rule 2: Pipeline 25%, Best Case 60%, Commit 100%. No Closed Won or Closed Lost rows exist in either snapshot, so nothing has been booked against the target in the data. Coverage = open pipeline ÷ target (rule 3). targets.csv holds targets for 2026-08-20 only; the prior coverage on this page uses the same denominator.

By owner of record

OWNER OF RECORD	TARGET	OPEN PIPELINE	COVERAGE	WEIGHTED	PRIOR WEIGHTED
Jordan Lee	\$700,000	\$715,000	1.02x	\$318,750	\$199,750
Taylor Brooks	\$650,000	\$535,000	0.82x	\$224,750	\$133,750
Morgan Patel	\$850,000	\$485,000	0.57x	\$121,250	\$121,250
Casey Nguyen	\$700,000	\$995,000	1.42x	\$665,250	\$491,000
All owners	\$2,900,000	\$2,730,000	0.94x	\$1,330,000	\$945,750

By forecast category — current (2026-08-20) and prior (2026-07-18)

FORECAST CATEGORY	WEIGHT	DEALS	AMOUNT	WEIGHTED	PRIOR DEALS	PRIOR AMOUNT	PRIOR WEIGHTED
Commit	100%	1	\$420,000	\$420,000	0	\$0	\$0
Best Case	60%	4	\$950,000	\$570,000	3	\$770,000	\$462,000
Pipeline	25%	11	\$1,360,000	\$340,000	13	\$1,935,000	\$483,750
Total open		16	\$2,730,000	\$1,330,000	16	\$2,705,000	\$945,750

Two of four owners are below 1x on their own. Morgan Patel 0.57x (\$485,000 ÷ \$850,000) and Taylor Brooks 0.82x (\$535,000 ÷ \$650,000). Casey Nguyen's 1.42x depends on Dovetail Travel (\$420,000) and Harborlight Mobility (\$290,000). current-pipeline.csv OwnerId, targets.csv

Weighted forecast rose \$384,250 on the same 16 deals — three upgrades and one amount change, nothing new and nothing closed

Weighted forecast bridge, 2026-07-18 → 2026-08-20

Matched by Opportunity ID (rule 7). 16 IDs in both files; none added, removed, or closed. Open pipeline moved \$2,705,000 → \$2,730,000 (+\$25,000, Lantern Beauty only). Category weights per rule 2.

The five opportunities that changed (prior → current)

OPPORTUNITY	STAGE	CATEGORY	AMOUNT	CLOSE DATE	WEIGHTED	Δ WEIGHTED
Aster Health 006SYNAUG001	Proposal Negotiation	Pipeline Best Case	\$340,000	2026-11-30	\$85,000 \$204,000	+\$119,000
Dovetail Travel 006SYNAUG004	Proposal Negotiation	Best Case Commit	\$420,000	2026-09-30	\$252,000 \$420,000	+\$168,000
Harborlight Mobility 006SYNAUG008	Proposal	Best Case	\$290,000	2026-09-30 2026-10-31	\$174,000	—
Junction Apparel 006SYNAUG010	Proposal Negotiation	Pipeline Best Case	\$260,000	2026-09-27	\$65,000 \$156,000	+\$91,000
Lantern Beauty 006SYNAUG012	Proposal	Pipeline	\$150,000 \$175,000	2026-10-15	\$37,500 \$43,750	+\$6,250

Source conflict on the three upgraded deals. Their current StageEnteredDates (Aster 2026-07-02, Dovetail 2026-06-05, Junction 2026-06-11) all fall *before* the 2026-07-18 prior snapshot, which recorded them in Proposal with different StageEnteredDates (2026-06-20, 2026-06-12, 2026-06-24). Dovetail and Junction moved to an earlier date. The deck reports the movement as recorded; it does not infer when the stage changes happened. *current-pipeline.csv* vs *prior-pipeline.csv*, *StageEnteredDate*

Half the weighted forecast sits in two deals, eight deals have been in stage 60+ days, and \$415,000 has gone quiet

Days in current stage, all 16 open opportunities (StageEnteredDate → 2026-08-20)

Opportunity age from CreatedDate is 96–196 days: every open opportunity also trips the 60-day flag on that measure (rule 6). Stage age is the more discriminating view, so it is charted.

Concentration — share of weighted forecast in the two largest open opportunities (rule 4)

Dovetail Travel · Commit · 006SYNAUG004	\$420,000
Aster Health · Best Case · 006SYNAUG001	\$204,000
Top two ÷ weighted forecast \$1,330,000	46.9%
Prior: Dovetail \$252,000 + Harborlight \$174,000 ÷ \$945,750	45.0%

Stale opportunities — \$415,000 with no logged activity in over 30 days

STALE OPPORTUNITY	OWNER	AMOUNT	WEIGHTED	LAST ACTIVITY	CLOSE DATE
Newbridge Education 006SYNAUG014	Taylor Brooks	\$95,000	\$23,750	2026-06-05 (76d)	2026-10-30
Lantern Beauty 006SYNAUG012	Casey Nguyen	\$175,000	\$43,750	2026-06-20 (61d)	2026-10-15
Elmstead Home 006SYNAUG005	Jordan Lee	\$60,000	\$36,000	2026-06-30 (51d)	2026-07-15 · past
Brookline Media 006SYNAUG002	Taylor Brooks	\$85,000	\$21,250	2026-07-03 (48d)	2026-09-30
4 of 16 open		\$415,000	\$124,750	15% of open pipeline · 9% of weighted	

Four deals carry the upside and four quiet deals carry the risk — none of the eight has a confirmed next step in the data

Upside carriers — the weighted forecast depends on these four (\$954,000, 72% of weighted)

OPPORTUNITY	STAGE • CATEGORY	AMOUNT	WEIGHTED	CLOSE	WHAT THE DATA SHOWS	WHAT IT DOES NOT SHOW
Dovetail Travel 006SYNAUG004 • Casey Nguyen	Negotiation • Commit	\$420,000	\$420,000	2026-09-30	Only Commit deal, 32% of weighted; upgraded from Best Case since 2026-07-18; 76 days in stage. NextStep: “Complete procurement approval”.	Whether approval is scheduled; why StageEnteredDate moved earlier.
Aster Health 006SYNAUG001 • Jordan Lee	Negotiation • Best Case	\$340,000	\$204,000	2026-11-30	Pipeline → Best Case (+\$119,000 weighted); activity 2026-08-10. NextStep: “Confirm renewal scope with finance”.	Renewal scope; no basis for a further upgrade.
Junction Apparel 006SYNAUG010 • Taylor Brooks	Negotiation • Best Case	\$260,000	\$156,000	2026-09-27	Pipeline → Best Case (+\$91,000 weighted); closes in 38 days. NextStep: “Confirm final approver”.	Who the final approver is.
Harborlight Mobility 006SYNAUG008 • Casey Nguyen	Proposal • Best Case	\$290,000	\$174,000	2026-10-31	Close slipped 2026-09-30 → 2026-10-31; category unchanged. NextStep: “Review the revised close plan”.	Reason for the slip is not recorded.

Downside exposure — \$124,750 weighted rests on opportunities with no recent activity

OPPORTUNITY	STAGE • CATEGORY	AMOUNT	WEIGHTED	CLOSE	WHAT THE DATA SHOWS	WHAT IT DOES NOT SHOW
Elmstead Home 006SYNAUG005 • Jordan Lee	Proposal • Best Case	\$60,000	\$36,000	2026-07-15	Close date 36 days past the snapshot; stale 51 days; still Best Case at 60%. NextStep: “Confirm whether the evaluation is active”.	Whether the deal is live at all.
Lantern Beauty 006SYNAUG012 • Casey Nguyen	Proposal • Pipeline	\$175,000	\$43,750	2026-10-15	Stale 61 days; amount raised \$150,000 → \$175,000 with no activity logged since 2026-06-20.	Basis for the amount increase.
Newbridge Education 006SYNAUG014 • Taylor Brooks	Proposal • Pipeline	\$95,000	\$23,750	2026-10-30	Stale 76 days — longest gap in the file. 66 days in Proposal.	Whether the evaluation timeline exists.
Brookline Media 006SYNAUG002 • Taylor Brooks	Proposal • Pipeline	\$85,000	\$21,250	2026-09-30	Stale 48 days; 78 days in Proposal; closes 2026-09-30.	Executive review date not reconfirmed.

Rule 8: staleness, slippage and concentration are exposure signals, not evidence that a deal will close or be lost. NextStep text quoted from current-pipeline.csv; seller-notes.csv repeats it verbatim.

Verify the three upgrades and the Commit deal before the forecast moves; fix six data defects before the next snapshot

Management actions — judgment, proposed for decision

ACTION	OWNER OF RECORD	WHY NOW
Verify Dovetail Travel's Commit status against the procurement-approval step before the forecast is committed upward.	Casey Nguyen	\$420,000 — 32% of weighted; only Commit deal. 006SYNAUG004
Confirm the evidence for the Aster Health and Junction Apparel Best Case upgrades, given the conflicting stage-entered dates.	Jordan Lee · Taylor Brooks	+\$210,000 of the +\$384,250 weighted movement. 006SYNAUG001, 006SYNAUG010
Decide whether Elmstead Home stays in Best Case or is re-dated / removed; it is 36 days past its close date with no activity for 51 days.	Jordan Lee	\$36,000 weighted at 60% on a deal the data cannot confirm is live. 006SYNAUG005
Set a plan for the coverage gap: open pipeline is \$170,000 short of target even at 100% win rate; Morgan Patel and Taylor Brooks are below 1x.	Revenue leadership	Coverage 0.94x; owner coverage 0.57x and 0.82x. targets.csv
Re-engage or re-categorise the four stale deals; decide by the next snapshot whether they remain in the forecast at current weights.	Taylor Brooks · Casey Nguyen · Jordan Lee	\$415,000 open, \$124,750 weighted. ...002, ...005, ...012, ...014

Pipeline hygiene — data problems to fix in the CRM

DEFECT	RECORDS	EFFECT ON THIS DECK
StageEnteredDate conflicts with the prior snapshot (two moved earlier; all three predate the prior snapshot that showed Proposal).	006SYNAUG001, ... 004, ...010	Stage aging for the three upgraded deals (49, 76, 70 days) is unreliable.
Prior snapshot (2026-07-18) contains LastActivityDates later than its own snapshot date (e.g. 2026-08-10, 2026-08-12).	prior-pipeline.csv, 12 of 16 rows	Prior-snapshot staleness cannot be computed; movement in activity cannot be shown.
Close date in the past while the opportunity remains open and weighted.	006SYNAUG005	\$36,000 weighted may be overstated.
Amount changed with no logged activity or note change.	006SYNAUG012	+\$6,250 weighted with no supporting record.
Seller notes duplicate the NextStep field and LastActivityDate for every ID; no free-text commentary.	seller-notes.csv, all 16	No seller view to cross-check categories.
No Closed Won / Closed Lost rows in either snapshot; target period undefined.	current-pipeline.csv, prior-pipeline.csv, targets.csv	Attainment to date is unknown; coverage compares open pipeline to the full target.

Every figure traces to five files — six gaps in those files limit how far the forecast call can be pushed

Sources used	Missing information	Limitations
• current-pipeline.csv — 16 open opportunities, SnapshotDate 2026-08-20. Basis for open pipeline, weighted forecast, coverage, concentration, aging and staleness. • prior-pipeline.csv — same 16 IDs, SnapshotDate 2026-07-18. Basis for movement. • targets.csv — four owner targets dated 2026-08-20, summing to \$2,900,000. • seller-notes.csv — 16 notes; identical to NextStep and LastActivityDate in current-pipeline.csv. • forecast-rules.md — rules 1–8 applied as written; snapshot date 2026-08-20. All figures were recomputed from these files. No web or background information was used. Data is synthetic; companies are fictional.	• Target period and whether any revenue has already been booked against it (no closed rows). • Targets for the prior snapshot — prior coverage uses the 2026-08-20 targets. • Historical win rates by stage or category; the rule-2 weights are conventions, not observed conversion. • Reasons for the three category upgrades, the Harborlight close-date slip and the Lantern Beauty amount change. • Stage definitions and exit criteria; whether “Negotiation” implies a proposal was accepted. • Any activity record for the prior snapshot that is consistent with its date.	• Two snapshots 33 days apart; no trend beyond one comparison. • Coverage is shown as computed (rule 3) without a benchmark ratio, because none is supplied. • Aging for the three upgraded deals depends on StageEnteredDates that conflict between snapshots. • Stale, slipped and concentrated deals are flagged as exposure only (rule 8); this deck makes no prediction of individual outcomes. • Owners named on page 7 are the OwnerName of record in current-pipeline.csv; no other assignment is implied. • Figures in dollars as supplied; no currency, discounting or timing adjustments applied.
