

Pipeline Health & Forecast

Revenue Operations | Snapshot: 2026-08-20

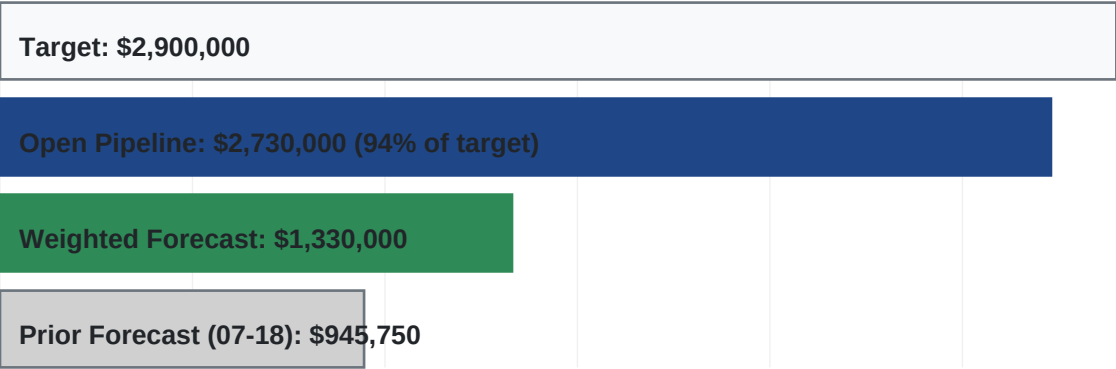

Weighted forecast up 40.6% to \$1.33M

Pipeline coverage is strong at 94% of target with positive momentum on category upgrades and deal progression. However, forecast is heavily concentrated in two deals (47% of weighted value) and 4 deals lack recent activity. Recommend focus on pipeline health actions while capturing confirmed upside from Dovetail (Commit) and Aster (BestCase).

Pipeline & Forecast Against Target

Open opportunities and weighted forecast vs. revenue target (Snapshot: 2026-08-20)

Key Observations

- Pipeline coverage of 94% exceeds healthy minimum; open pipeline \$2,730,000 supports target (current-pipeline.csv)
- Weighted forecast \$1,330,000 incorporates Pipeline 25%, BestCase 60%, Commit/Closed Won 100% (forecast-rules.md)
- Forecast growth of \$384,250 (4063%) driven by category upgrades (Aster, Dovetail) and new activity
- Prior weighted forecast \$945,750 provides baseline for period-over-period movement

Deal Drivers: Upside & Downside

Largest opportunities and risk factors shaping forecast (Snapshot: 2026-08-20)

Upside Opportunities

006SYNAUG004 Dovetail Travel

Amount: \$420,000 | Category: Commit | Weighted: \$420,000

006SYNAUG001 Aster Health

Amount: \$340,000 | Category: BestCase | Weighted: \$204,000

006SYNAUG008 Harborlight Mobility

Amount: \$290,000 | Category: BestCase | Weighted: \$174,000

Downside Risk Factors

• Concentration Risk

Top 2 deals represent 47% of weighted forecast. Loss of either Dovetail (Commit \$420K) or Aster (BestCase \$204K) materially impacts plan.

• Stale Activity

4 deals inactive 30+ days: Newbridge, Lantern Beauty, Elmstead Home, and one other. No recent seller engagement.

• Stage Stalling

8 deals 60+ days in current stage without progression. Dovetail, Harborlight, Junction require action.

• Close Date Slip

Harborlight Mobility slipped 1 month (Sept 30 → Oct 31). Risk of further delays in Proposal stage.

- current-pipeline.csv: 16 open opportunities, 2026-08-20 snapshot
- prior-pipeline.csv: Same 16 opportunities, 2026-07-18 snapshot
- targets.csv: \$2.9M total target across 4 owners
- seller-notes.csv: Seller-provided next steps
- forecast-rules.md: Weighting methodology, thresholds, aging criteria

Calculation Methodology

- Coverage = Open Pipeline / Target (all 16 opportunities / \$2.9M target)
- Weighted Forecast = $\text{Sum}(\text{Amount} \times \text{Weight})$ by ForecastCategoryName (Pipeline 25%, BestCase 60%, Commit 100%)
- Concentration = $(\text{Top 2 Weighted Values}) / \text{Total Weighted Forecast}$
- Stale Opportunities = LastActivityDate > 30 days before snapshot
- Opportunity Aging = CreatedDate to snapshot; flagged at 60+ days
- Stage Aging = StageEnteredDate to snapshot; flagged at 60+ days
- Movement = Compare by OpportunityId between snapshots

Analysis Limitations

- No Closed Won or Closed Lost deals in snapshot; forecast reflects open pipeline only
- Seller notes are generic next steps; no detail on business case or technical blockers
- No information on deal size trends, customer industry, competitive dynamics
- Concentration risk identified but not quantified with probability or loss scenarios
- Stage aging flags delays but does not explain root causes
