

Coverage holds at 0.94x. Weighted forecast reaches only 46% of target.

A snapshot of open pipeline against the August target, where the forecast is exposed, and what revenue leadership should do about it before the next review.

SNAPSHOT DATE	PRIOR COMPARISON	SOURCE
2026-08-20	2026-07-18	source-pack/august-pipeline/

Coverage looks adequate; the weighted number depends on two deals and two reps.

COVERAGE 0.94x \$2.73M open ÷ \$2.90M target	WEIGHTED FORECAST \$1.33M 45.9% of \$2.90M target	CONCENTRATION 46.9% of weighted value in 2 of 16 deals	STAGE-AGED ≥60D \$890K 66.9% of weighted forecast
---	--	---	--

WHY THE CALL IS "EXPOSED, NOT LOST"

1. Concentration.

Two opportunities — Dovetail Travel (\$420K, Commit) and Aster Health (\$204K weighted, Best Case) — hold 46.9% of the \$1.33M weighted forecast. A single slip on either moves the number materially.

2. Owner imbalance.

Morgan Patel carries the largest target (\$850K) but the lowest coverage (0.57x) and weighted attainment (14.3%); all 4 of her open opportunities sit in Pipeline category, with none in Best Case or Commit.

3. Stage aging is concentrated, not spread.

All 8 open opportunities belonging to Taylor Brooks and Casey Nguyen have sat in their current stage 60+ days (\$890K weighted); none of Jordan Lee's or Morgan Patel's have.

4. Hygiene gaps.

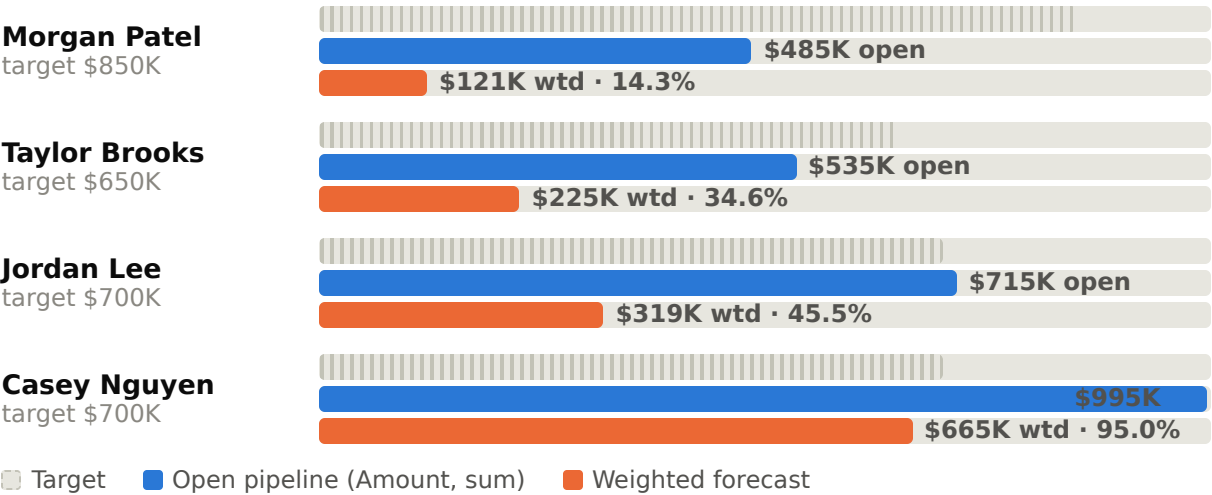

4 of 16 open opportunities are stale (no activity in 30+ days, \$415K open / \$125K weighted), including one — Elmstead Home — whose close date has already passed without a stage update.

IMPLICATION FOR THIS REVIEW

Protecting the two concentrated deals already in motion is not enough to close the gap to target. The forecast needs either activation of stalled mid-funnel pipeline in **Taylor Brooks's** and **Casey Nguyen's** books, or new qualified coverage in **Morgan Patel's** — and a resolved close date on **Elmstead Home** before the next snapshot.

Attainment splits sharply by owner — aggregate coverage hides it.

TARGET · OPEN PIPELINE · WEIGHTED FORECAST, BY OWNER (\$, SCALE TO \$1.0M)

TOTALS & INPUTS

OWNER	TARGET	OPEN	WTD.	COV.
Morgan Patel	\$850K	\$485K	\$121K	0.57x
Taylor Brooks	\$650K	\$535K	\$225K	0.82x
Jordan Lee	\$700K	\$715K	\$319K	1.02x
Casey Nguyen	\$700K	\$995K	\$665K	1.42x
Total	\$2.90M	\$2.73M	\$1.33M	0.94x

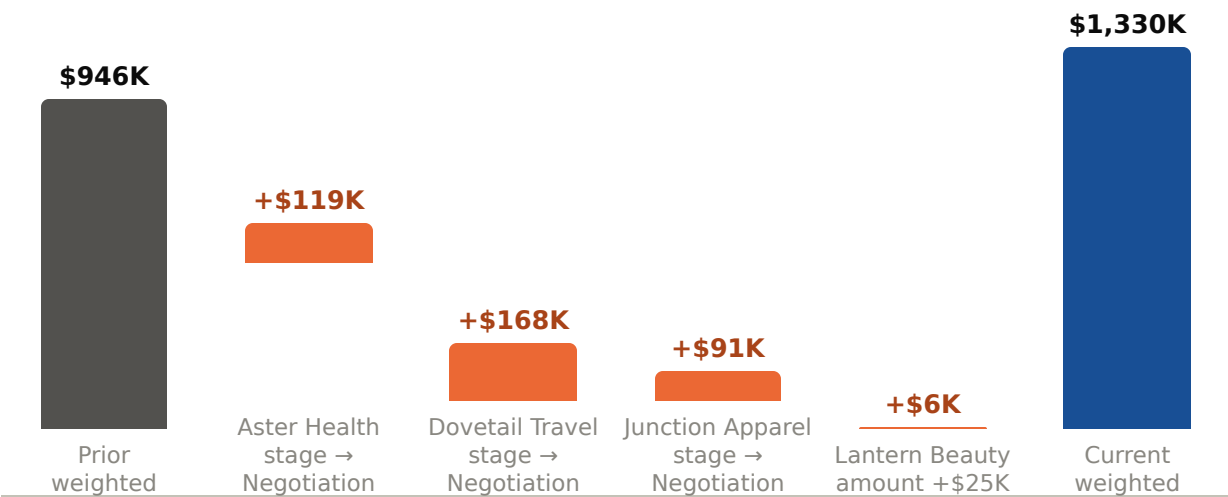

Coverage = open pipeline (Amount, sum, stage ≠ Closed) ÷ target (rule 3).

Weighted forecast = Σ Amount × category weight — Pipeline 25%, Best Case 60%, Commit 100% (rule 2).

No Closed Won / Closed Lost records exist in this snapshot; all 16 opportunities are open.

Three deals advancing stage drove the entire \$384K weighted gain.

WEIGHTED FORECAST BRIDGE (\$K)

The other 12 of 16 open opportunities show no stage, category, amount, or close-date change since the prior snapshot.

OPPORTUNITIES THAT MOVED (BY OPPORTUNITY ID)

OPP.	PRIOR → CURRENT	WTD. Δ
006SYNAUG001	Aster Health: Proposal/Pipeline → Negotiation/Best Case	+\$119,000
006SYNAUG004	Dovetail Travel: Proposal/Best Case → Negotiation/Commit	+\$168,000
006SYNAUG010	Junction Apparel: Proposal/Pipeline → Negotiation/Best Case	+\$91,000
006SYNAUG012	Lantern Beauty: Amount \$150K → \$175K (Pipeline, unchanged)	+\$6,250

Close-date movement, no category change: Harborlight Mobility (006SYNAUG008) close date moved 2026-09-30 → 2026-10-31 (+31 days); stage (Proposal) and category (Best Case) unchanged, so weighted value is unchanged at \$174,000.

Half the pipeline is stage-aged, and it belongs to two owners, not four.

CONCENTRATION (RULE 4)

Share of \$1,330,000 weighted forecast held in the 2 largest open opportunities

Dovetail Travel \$420,000 (Commit) + Aster Health \$204,000 weighted (Best Case, \$340,000 × 60%) = **\$624,000** of \$1,330,000. Remaining 14 opportunities: \$706,000.

STAGE AGING ≥ 60 DAYS (RULE 6)

8 of 16

open opportunities · \$890,000 weighted (66.9% of total)

All 8 belong to **Taylor Brooks** and **Casey Nguyen** (4 each — every open opportunity either owns). None of Jordan Lee's or Morgan Patel's opportunities are stage-aged.

OPPORTUNITY AGING (RULE 6)

16 of 16

open opportunities are 60+ days old by CreatedDate

Youngest opportunity by CreatedDate is 96 days old at snapshot. This measure does not differentiate risk within the current book.

STALE OPPORTUNITIES — LASTACTIVITYDATE MORE THAN 30 DAYS BEFORE SNAPSHOT (RULE 5)

OPP.	ACCOUNT	OWNER	AMOUNT	LAST ACTIVITY	DAYS SINCE
006SYNAUG002	Brookline Media	Taylor Brooks	\$85,000	2026-07-03	48
006SYNAUG005	Elmstead Home	Jordan Lee	\$60,000	2026-06-30	51
006SYNAUG012	Lantern Beauty	Casey Nguyen	\$175,000	2026-06-20	61
006SYNAUG014	Newbridge Education	Taylor Brooks	\$95,000	2026-06-05	76

\$415,000 open / \$124,750 weighted across 4 stale opportunities. Kingswell Hospitality (006SYNAUG011) last activity 2026-07-21 is exactly 30 days before snapshot — at the rule's threshold, not counted as stale under the >30-day test as written.

The upside is booked in stage movement; the flagged risk is a missed close date.

UPSIDE — WEIGHTED VALUE GAINED SINCE PRIOR SNAPSHOT

Dovetail Travel 006SYNAUG004 · Casey Nguyen		+\$168,000
Aster Health 006SYNAUG001 · Jordan Lee		+\$119,000
Junction Apparel 006SYNAUG010 · Taylor Brooks		+\$91,000
Lantern Beauty 006SYNAUG012 · Casey Nguyen		+\$6,250

All four moves reflect logged stage, category, or amount changes between the 2026-07-18 and 2026-08-20 snapshots (current-pipeline.csv, prior-pipeline.csv). No slippage or category downgrades occurred among open opportunities in this period.

Total upside since prior snapshot: +\$384,250 weighted, across these 4 of 16 open opportunities.

FLAGGED — FACTUAL RISK CONDITIONS, NOT CLOSE PREDICTIONS

Elmstead Home **PAST-DUE CLOSE DATE**
006SYNAUG005 · Jordan Lee · \$60,000 · Proposal / Best Case
Close date 2026-07-15 is 36 days before the 2026-08-20 snapshot; stage and category unchanged since the prior snapshot; last logged activity 2026-06-30 (51 days before snapshot — also stale).

Harborlight Mobility **CLOSE DATE SLIPPED**
006SYNAUG008 · Casey Nguyen · \$290,000 · Proposal / Best Case
Close date moved 2026-09-30 → 2026-10-31 (+31 days) since the prior snapshot; stage and category unchanged; weighted value unchanged at \$174,000.

Per forecast-rules.md rule 8: neither flag is treated here as evidence the opportunity will close or will be lost — both are reported as pipeline-hygiene conditions for owner and management follow-up.

Four owners, four different exposures — and three data gaps to close before the next snapshot.

BY OWNER — CALCULATED ATTAINMENT, WITH SUGGESTED FOCUS
(interpretation, not source data)

OWNER	WTD. %	SUGGESTED FOCUS
Morgan Patel 14.3% weighted · 0.57x coverage	14.3%	Largest target (\$850K), lowest weighted attainment; all 4 open opportunities are Pipeline-category with none in Best Case or Commit. Review category assignment and upgrade candidates.
Taylor Brooks 34.6% weighted · 0.82x coverage	34.6%	All 4 open opportunities are stage-aged ≥60 days. Confirm current status on Brookline, Fortis, Junction, and Newbridge before next snapshot.
Jordan Lee 45.5% weighted · 1.02x coverage	45.5%	Coverage is on target, but owns Elmstead Home — stale with a close date already past. Confirm a new close date or move the stage.
Casey Nguyen 95.0% weighted · 1.42x coverage	95.0%	Highest weighted attainment, but Dovetail Travel alone is 31.6% of total weighted forecast, and all 4 of Casey's opportunities are stage-aged ≥60 days.

Total: \$1,330,000 weighted forecast across 16 open opportunities — 45.9% of the \$2,900,000 combined target.

UNRESOLVED DATA PROBLEMS

- 1. seller-notes.csv carries no incremental information.** Its SellerNote and NoteDate fields duplicate NextStep and LastActivityDate in current-pipeline.csv line-for-line across all 16 records — no seller commentary beyond what current-pipeline.csv already shows.
- 2. Elmstead Home close date is 36 days past due** (006SYNAUG005, CloseDate 2026-07-15) with no stage change logged since the prior snapshot.
- 3. Kingswell Hospitality sits exactly at the staleness boundary** (006SYNAUG011, LastActivityDate 30 days before snapshot) — flagged here for visibility though the >30-day rule as written does not count it.
- 4. No prior-period target exists.** targets.csv provides only the 2026-08-20 snapshot, so prior-period coverage cannot be calculated for comparison.

What this deck is built on, what it is not, and where to read the numbers carefully.

SOURCES USED

FILE	CONTENT	RECORDS
current-pipeline.csv	Open pipeline, snapshot 2026-08-20	16
prior-pipeline.csv	Open pipeline, snapshot 2026-07-18	16
targets.csv	Owner targets, snapshot 2026-08-20	4
seller-notes.csv	Duplicates NextStep / LastActivityDate — see p.7	16
forecast-rules.md	Rules 1-8, applied as written throughout	—

Scope: only source-pack/august-pipeline/ was used. No web search, no outside benchmarks, no prior deck content.

MISSING INFORMATION

- Prior-period (2026-07-18) target — not provided, so prior coverage is not shown.
- Seller commentary beyond NextStep — seller-notes.csv adds none.
- Management judgment or annotations on individual deals — none in the source pack; every action on p.7 is analyst-suggested and labeled as such, not sourced from a seller or manager note.
- Closed Won / Closed Lost activity — no closed records appear in either snapshot; both snapshots are 100% open pipeline.

LIMITATIONS & HOW TO READ THIS DECK

Snapshot date is **2026-08-20**; all "current" figures are as of that date. Prior comparison is **2026-07-18**, a 33-day gap, not a defined monthly cadence.

Staleness, stage/opportunity aging, and concentration (pp.5-6) are pipeline-hygiene signals calculated exactly per forecast-rules.md rules 4-6, and per rule 8 are not treated as evidence that any opportunity will close or slip.

Suggested focus areas (p.7) are this analyst's interpretation of the calculated figures, kept visibly separate from source facts; they are not seller or management input.
