MANAGEMENT ACTIONS judgment • owners are record owners DATA PROBLEMS TO FIX pipeline hygiene, not judgment

- 1

Validate the Commit call on Dovetail Travel — \$420k at 100% weight is 31.6% of the forecast; close 2026-09-30, next step “Complete procurement approval”. Confirm approval status before relying on it. Owner: Casey Nguyen
- 2

Decide the four stale opportunities (\$415k) — re-engage with a dated next step or move them out of the forecast. Elmstead Home first: close date passed; the 2026-06-30 note asks whether the evaluation is active. Owners: Lee (Elmstead) • Nguyen (Lantern) • Brooks (Newbridge, Brookline)
- 3

Close the coverage gap on Morgan Patel's book — \$485k open vs \$850k target (0.57×), all five opportunities still Pipeline category. Agree a pipeline-build plan and which deals can advance on evidence. Owner: Morgan Patel
- Elmstead Home (006SYNAUG005): CloseDate 2026-07-15 is before the snapshot date yet the record is open in Best Case.

• StageEnteredDate contradicts the prior snapshot for the three stage moves: Aster 2026-07-02, Dovetail 2026-06-05, Junction 2026-06-11 all precede 2026-07-18, when each was still in Proposal. Stage aging for these three cannot be trusted.

• targets.csv has per-owner targets only — no team total, no target period — while close dates run to 2027-03-31. Coverage uses summed owner targets as an assumption.

Sources source-pack/august-pipeline/: current-pipeline.csv (2026-08-20, 16 rows) • prior-pipeline.csv (2026-07-18, 16 rows) • targets.csv (2026-08-20, 4 owners) • seller-notes.csv (16 notes) • forecast-rules.md (rules cited by number above). Limitations Synthetic data. seller-notes.csv repeats NextStep verbatim (no independent commentary). No Closed Won/Lost rows, team target or target period supplied. Stale data, slippage and concentration are not proof a deal will close or be lost (rule 8). Snapshot 2026-08-20.
