Net weighted-forecast movement: +\$384,250 (\$945,750 → \$1,330,000) — from category upgrades, not amount growth.

CONCENTRATION · AGING · STALE

CONCENTRATION — RULE 4

47%

of weighted forecast (\$624,000 of \$1,330,000) in top 2 opps:

|                     |          |           |
|---------------------|----------|-----------|
| Dovetail Travel 004 | Commit   | \$420,000 |
| Aster Health 001    | BestCase | \$204,000 |

AGING — RULE 6, FLAG ≥60 DAYS

By CreatedDate: all 16 open opps ≥60d (96–196d) — doesn't discriminate.

By StageEnteredDate: 8 of 16 flagged ≥60d. Longest: Brookline Media 002 78d, Dovetail Travel 004 76d (+6 more).

STALE — INACTIVE >30D (RULE 5)

|                     |     |
|---------------------|-----|
| Newbridge Educ. 014 | 76d |
| Lantern Beauty 012  | 61d |
| Elmstead Home 005   | 51d |
| Brookline Media 002 | 48d |

Rule 8: concentration, aging, and staleness are descriptive only — not evidence a deal will close or slip.

MANAGEMENT ACTIONS

1 OWNER · MORGAN PATEL

Territory coverage 0.57× (\$485,000 ÷ \$850,000 target), lowest of 4. Prioritize new pipeline generation this cycle.

2 OWNER · TAYLOR BROOKS

Territory coverage 0.82× (\$535,000 ÷ \$650,000), 2nd-lowest; holds 2 of 4 stale opps (Brookline Media 48d, Newbridge Educ. 76d). Refresh or requalify.

3 OWNER · JORDAN LEE

Elmstead Home 005 close date (2026-07-15) is already before this snapshot, deal still open and stale (51d). Confirm status this week.

Owners & territory figures are supplied data (targets.csv, current-pipeline.csv); prioritization is analyst interpretation, not a source fact.

DATA PROBLEMS TO FIX — HYGIENE, NOT FORECAST JUDGMENT

Close date before snapshot: Elmstead Home 005 — CloseDate 2026-07-15 is 36 days before this 2026-08-20 snapshot; still open (Proposal/BestCase), unchanged since 2026-07-18.

Redundant source: seller-notes.csv duplicates NextStep/LastActivityDate already in current-pipeline.csv for all 16 rows — no incremental commentary this snapshot.

Non-discriminating threshold: the 60-day CreatedDate aging flag (rule 6) catches all 16 open opps (96–196d) — not usable as a filter here; stage aging is the workable signal.

SOURCES & LIMITATIONS

Files used (source-pack/august-pipeline/): current-pipeline.csv (16 rows, 2026-08-20), prior-pipeline.csv (16 rows, 2026-07-18), targets.csv (4 owners), seller-notes.csv (16 rows), forecast-rules.md (rules 1–8). No other files or folders opened.

Limits: no Closed Won/Lost rows in either snapshot — 100%/0% closed weights defined but unused. Amounts unrounded; ratios rounded to 2 decimals.
